EDUCATION

University of British Columbia (UBC)

Bachelor of Science, Major in Mathematics

Vancouver, BC

Expected graduation: April 2029

Relevant Coursework: Models of Computation, Systematic Program Design, Multi-variable Calculus, Linear Algebra

PROJECTS

LinkMCP | *Next.js, TypeScript, React Flow, MCP SDK, Supabase* | Hackathon Project

2025

- Built a visual builder that chains provider methods into reusable workflows, replacing hand-written schemas.
- Exposed saved workflows as MCP tools over an SSE server, with Supabase auth and OAuth provider connections.
- Added shareable method links and a community page for workflows; pitched the architecture to investors.
- Invited by a judge (founder of Althra) to apply to the Althra incubator.

Hand Gesture Recognition | *Python, MediaPipe, OpenCV, scikit-learn*

2026

- Built a real-time gesture recognition pipeline using MediaPipe hand landmarks, OpenCV, and scikit-learn.
- Collected a 700-sample, 7-gesture landmark dataset; normalized it to be invariant to hand position and size.
- Trained a random forest classifier (80/20 split) to label gestures live from a webcam feed.

AI Resume Generator | *Python, Groq API (Llama 3.3), FPDF*

2025

- Built a Python CLI that generates tailored resumes and cover letters from user input using Llama 3.3 70B.
- Designed a prompt builder class that assembles role-specific instructions from user data and job descriptions.
- Built a custom PDF generator with FPDF for clean, ATS-friendly output.

EXPERIENCE

Team Co-Lead (2nd Place, Province Wide)

Oct 2024 – Apr 2025

APEGA Science Olympics

Edmonton, AB

- Directed the design of a robot using a gyroscope, infrared remote control, and magnetic detection sensors.
- Led a 4-person team through planning, prototyping, and testing of the underground object detection system.
- Achieved self-stabilization and presented technical results, earning a 2nd place provincial finish.

Construction Labourer

July 2025 – Aug 2025

Woodfibre LNG Project (Ledcor / Bird Construction)

Squamish, BC

- Maintained a zero-incident safety record over 12-hour shifts by following WHMIS and CSTS protocols on site.
- Supported pipefitters and HDPE fusers with daily tasks and coordinated handoffs.
- Communicated effectively within a multidisciplinary team and alongside heavy machinery operators.

Clinical Support Staff

April 2025 – Aug 2025

Envision Mind Care

Edmonton, AB

- Provided compassionate emotional support to diverse patients, fostering a safe and stabilizing environment.
- Maintained strict confidentiality and professional boundaries in compliance with healthcare regulations.
- Adapted communication strategies to de-escalate sensitive situations with patients in care.

Youth Literacy Facilitator

Jan 2023 – Aug 2025

EPL

Edmonton, AB

- Facilitated interactive literacy sessions that built early reading skills and confidence in children.
- Mentored diverse youth groups, tailoring engagement to individual learning needs and pace.
- Coordinated with library staff to organize logistics for weekly events.

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, SQL, C#, LaTeX

Libraries and Frameworks: scikit-learn, OpenCV, MediaPipe, pandas, NumPy, React, Next.js, FPDF

Developer Tools: GitHub, VS Code, Jupyter Notebook, Supabase, Vercel

Certifications: CSTS (Construction Safety), Electronic Arts Software Engineering Virtual Experience
